

Original Kitchens

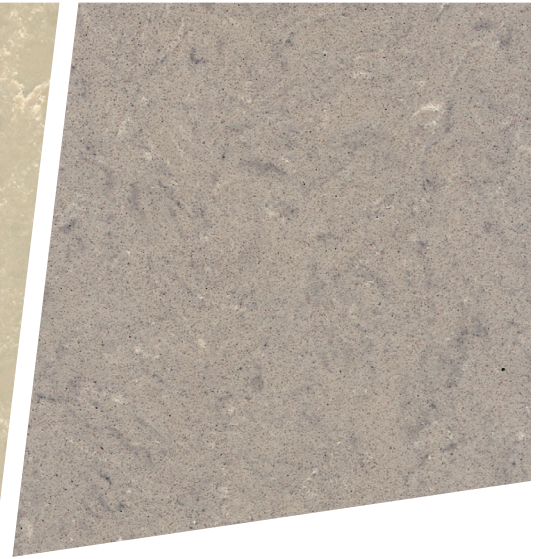

designed by nature, made for life

TechniStone®

Why to choose Technistone®?

What is Technistone®?

Engineered stone – Technistone® – consists of 93 % carefully selected natural materials, especially quartz and granite. Other components of the material are resin, color pigments and additional ingredients that ensure high durability, resistance, consistency and required design.

For high resistance

Technistone® kitchen countertops are highly resistant to scratches, knife contact, usual cooking temperatures or acids normally connected with domestic use (e.g. lemon juice or vinegar). Normal cutting or tenderizing with a wooden mallet directly on the kitchen countertop are simply not a problem. These properties really distinguish Technistone® engineered stone from other comparable solutions and enable your kitchen countertop to function essentially without limitation, even after years of punishing use.

For easy maintenance

Easy and fast maintenance are fundamental characteristics of Technistone® materials. Surface textures comparable with that of glass, precise technical design of edges and joints combine with practically no moisture absorption, significantly facilitating the cleaning of surfaces made from Technistone® engineered stone. Moreover, the product is certified harmless to health and food can be laid directly on the kitchen countertop, without the risk of contamination. This is one of the most significant everyday qualities you will appreciate, your family's safety.

For elegance and design

A wide variety of colors, structures and detailed craftsmanship ensure the surface you select is the pinnacle of design and elegance. Technistone® materials rank among top interior solutions meeting even the most arduous requirements. For those seeking a truly unique design feature, Technistone® offers our “Noble line” poles apart from the competition and absolutely the most elegant material available.

Advantages of Technistone® materials

- „Nature's materials made by people for people“ – the inherent advantages of natural materials enhanced by our skilled craftsmen create a combination that is consistent with life-long use.
- Modern design
- A broad range of colours and structures inspired by nature
- High resistance to mechanical and chemical damage
- Easy maintenance
- Nonabsorbent
- Antibacterial
- Elegant designs in both modern and rustic concepts
- „Whitest whites“ on the market
- Colour uniformity
- Durability coupled with timeless elegance
- The product is certified for contact with food

Why limit yourself?

Cut-outs of various shapes, everything from the practical, such as drainage grooves, to the artistic, such as determining the edge finishing, can all be custom-tailored. Technistone® materials are available with surface finishes ranging from the reflective, polished surface to silky-smooth “antique” appearance.
